

Installation Instructions Pre-Filter-RAPTOR-660R GYT-5LP95-11-BL

Please read and understand these instructions completely before installation to avoid any damage to your motorcycle and/or accessory.

Dealer:

These instructions contain important information for future reference and must be given to the customer.

General:

This water-repellent pre-filter will stop splashes of water and mud, and all dirt larger than .125mm (.005"), from entering your air filter. This material is water repellent not waterproof. Consequently, if the air box fills with water the filter will become wet. The water repellency treatment is good for approximately one year.

1. Installation:

a) To install, pull the pre-filter over the air filter, making sure the elastic band is stretched over the bottom edge.

2. Maintenance:

a) Periodically check the pre-filter to see if it is dirty

b) For normal cleaning remove pre-filter, use dish soap and a soft bristle scrub brush if necessary, then air dry.

c) For field cleaning, remove pre-filter, turn it inside out and hit it against a soft surface such as your leg to shake out the dirt
