4	B4J-H2117-00	Wire harness	1
(5)	B4J-H21E2-00	USB Port	1
6	B4J-H21E1-02	Power Converter	1
7	B4J-F5848-00	Key	2
8	JW1-K6179-01	M6 Hex Head Bolt with washer	2

^{*} Part supplied with kit only and not available separately.

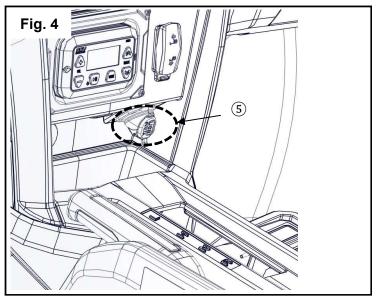

PREPARATION:

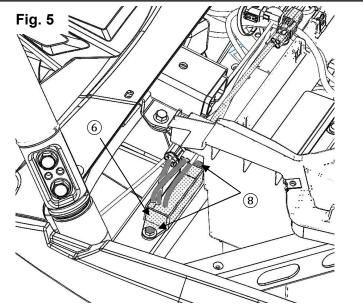

- Place the vehicle on a secure and level surface.
- Set the parking brake.
- Clean the mounting surfaces before beginning installation.
- Disconnect the battery.

INSTALLATION:

- 1. Remove the hood and remove the nine bolts for the inner firewall. Retain the hardware for reuse. (Fig. 1)
- 2. Disconnect the speed key and set the inner firewall aside.
- 3. Fold down the GPS cover inside the cab. Remove the four screws and remove the cover plate. (Fig. 2)
- 4. Remove the rubber access plug. It will not be reused. (Fig. 2)
- 5. Align the ② Dock mount with the four mounting holes in the GPS dash compartment. (Fig. 2)
- 6. Thread in the four ③ Phillips screws from the inner firewall side and through the GPS dash compartment and into the ② Dock. (Fig. 3)
- 7. Route the ② Dock wire harness through the access hole and into the inner fire wall area. Connect it to the vehicle wiring harness 4 PIN power with blue tape wrapped around it. (Fig. 3)
- 8. Seat the grommet and seal the hole. (Fig. 3)
- 9. Remove the retaining nut from the ⑤ USB Port.
- 10. Loosen the center dash and move it upward to make space and attach the (5) USB Port.
- 11. Remove the plug for the USB socket in the center dash and route the (5) USB Port into the access hole. (Fig. 4)
- 12. Thread the retaining nut back on the ⑤ USB Port hand tight.
- 13. Route the ⑤ USB Port wire to the inner fire wall area and will connect to ⑥ Power Converter in Step 18.
- 14. Reinstall the center dash.
- 15. Remove the right-side front fender to create access. Retain the hardware for reinstallation.
- 16. Install the two (§) M6 Hex Head Bolts to form the threads into the frame. Then remove them to make installing the (6) Power Converter easier. (Fig. 5)
- 17. Install the 6 Power Converter in the inner fire wall section with two 8 M6 Hex Head Bolts (Fig. 5)
- 18. Locate the black accessory power connector with the blue tape and connect the 4 Wire Harness at the fuse side of the harness. Connect the 5 USB Port to the 6 Power Converter. (Fig. 6)
- 19. The other two connections of the ④ Wire Harness will connect to the ⑥ Power Converter. (Fig. 6)

- 20. Reconnect the battery.
- 21. Press the power button on the ① Display Unit and check operation.
- 22. Verify the USB port functions correctly.
- 23. Reinstall the inner firewall with the stock bolts.
- 24. Reinstall the right front fender with the stock bolts.
- 25. Reinstall the hood.
- 26. 7 Keys are used to engage and disengage the lock on the 2 Dock. This secures the 1 Display Unit to the 2 Dock.

MAINTENANCE:

Periodically, check torque on all hardware. If loose hardware is found, re-torque to specification.

CARE AND CLEANING:

Clean painted metal parts with a clean soft cloth and mild soap and water solution. Rinse and dry.

CUSTOMER SERVICE:
